

POSSIBLE QUESTIONS FOR  
JIMMY McCLARY  
and  
DOTTYE CAMILLO

GENERAL COMMENT:

You can dispute another person's testimony, especially if it is mentioned to you, as in questions 3), 4), and 5), BUT, BE CAREFUL!!!!!! Don't mention that he's a pompous \_\_\_\_\_. If necessary, state your opinion as different from his, or, better, state where facts are not consistent with his statement. DON'T call him a liar.

POSSIBLE QUESTIONS:

- 1) How could you let this happen?

-----priorities vs resources-----

BE CAREFUL of indirect criticism of CSA or DMK.

- 2) Why did you let this happen?

same as 1)

- 3) Mr. \_\_\_\_\_ just testified that there was no security on your system. How would you respond to that?

- \*\* 4) Mr. \_\_\_\_\_ just testified that there was no security on your systems. That implies to me that Los Alamos was, at best, insensitive to the possibility of these penetrations.

-----BOOBY TRAP-----

- (1) This is a statement by the Member, not a question.  
(2) "Have you stopped beating your wife?"

My advice:

If your judgement is to answer, despite (1) above, answer question 3) instead. Nobody ever said that you had to be responsive to questions like this one.

Dw

- insert i. 4W.  
 for access 5)  
 1 males  
 - DCN signon ✓  
 - changed 6)  
 pass for  
 priv. acct  
 - awareness 7)  
 ✓ 8)  
 Mat 1/26/02

No  
 Adjusted  
 level where its  
 less likely

dest. not  
 serious because  
 of DA  
 No destruction  
 of HW

Mr. \_\_\_\_\_ just testified that there was no security on your systems. What have you changed since these incidents to improve that situation.

How are TELENET numbers assigned and how could these people get your number?

Access code

How are your access codes assigned now?

Telenet assign theirs } Did not  
 we do ICN } know that so serious

Looking for  
 VAXe - mat  
 LA spec.

Were any laws violated in this incident?

-----BOOBY TRAP-----

You're not a lawyer. Duck it. I read by wire

Were any regulations broken in this incident?

-----BOOBY TRAP-----

They broke some using the machines. Did we break any in "not securing the machines properly". We did our work properly, but that can be part of the question.

10) What was the extent of the Government's loss in these incidents?

\$150 Telenet 3-4 man-months  
 \$150 CPU user data \$1200000

11) What could have been lost? Just what was the potential for espionage? for sabotage?

None  
 corruption of data - sophis.  
 disclose, mod, destroy

12) Do you think that this is going to continue to happen? How frequently?

-----BOOBY TRAP-----

You're not a prophet either.

Expect more attempts because of  
 increasing # of people interested  
 No guarantee it won't. Shouldn't  
 try. Nat'l resource - must be  
 available.

Routine event in future - be prepared  
 - learn about hackers - tech, exp. range  
 - apply to our systems

OS-4  
into efforts

The law, see, see,  
emphasis on see, see,  
Property - did atty

\*\* 13)

Ms. Camillo, why did you fail to protect valuable Government property?

Threats in open market & risk protection  
Protecting NM high priority

If even Los Alamos can't protect itself, what can organizations that do not have Los Alamos's expertise and resources do to protect themselves from this kind of attack.

-----BOOBY TRAP-----

- (1) Who says that we can't protect ourselves, and
- (2) "have you stopped beating your wife?"
- (3) Answer the second part of the question.

15) What laws are needed to stop this nonsense? What can we, the Congress, do to help?

-----BOOBY TRAP-----

Be sure that DOE approves your answer to this question.

16) Mr. McClary, in your own personal opinion, what can we do?

-----BOOBY TRAP-----

You can't really have a personal opinion in these circumstances.

17) What are you going to do the next time this happens?

What we did this time - fix and

18) When is this going to happen again. To you or to someone else.

-----BOOBY TRAP-----

see question 12)

Is he surprised right now - somewhere an open system  
if it's not
